

Table 1

Campus Tour	Info Session	Class Visited	Stats on Admissions	Major	Extracurriculars	Misc.	
Students were extra friendly and helpful. One was a psych major!	Boring! Talked a lot about Sciences and Research and Study Abroad.	Students were not engaging with the prof - Eng Prof asked ?, no one replied.	My test scores match 25%, my GPA is higher than avg. Lots of Intl Students	Offer Psychology, but not a lot of Premed.	Womens rugby is intramural. Have radio station.	Between classes, students did not seem to be studying. Too easy???	
Campus was beautiful!	Adm Officer was enthusiastic, funny. Lots of photos of his cats on desk.	Didn't visit a class.	Test scores near 75%, GPA higher than avg. Yield is very high.	Lots of pre-med students, but not many undergrads doing Psych.	Internships are in summer, because so far removed from cities - schools will pay if internships is not paid. No Rugby.	No grad students, so seniors get to do research with profs.	
No separation between campus & city - all blended together. Lots of students live off campus.	Skipped Info session to visit a class.	Chemistry 101 - too basic for me. LARGE class!	Test scores & avg GPA really high	Strong Psychology/ lots pre-meds get into prestigious med schools.	Freshman can have own radio show. Most sports are Division 3, but Rugby is Division 4. Have Intramural.	AP Credit means could prob. skip most large/ introductory classes.	
Science bldgs not near each other.	Special pre-med program for Psychology majors. Student panel was excellent - lots of enthusiastic athletes	Really interesting psychology class.	My grades/test scores higher than avg.	See Info session	30% of students in sorority/frat - big part of social life. Might be able to play on Rugby Team - Div 3.	Athletes housed separately - didn't get a strong sense of community.
